

UNITHROID[®] (Levothyroxine Sodium Tablets, USP)

Life with hypothyroidism
isn't always straightforward.

IS YOUR CURRENT TREATMENT

**THERE AT
EVERY TURN?**

**TALK TO YOUR DOCTOR TO SEE IF BRAND-NAME
UNITHROID MAY BE RIGHT FOR YOU.**

APPROVED USE FOR UNITHROID

UNITHROID[®] (levothyroxine sodium) tablets is an oral prescription medicine used:

- To replace a hormone usually made by the thyroid gland in adults and children with hypothyroidism
- Along with surgery and radioiodine therapy to manage a certain type of thyroid cancer

UNITHROID should not be used to treat noncancerous enlargement of the thyroid in patients with normal iodine levels, or temporary hypothyroidism due to inflammation of the thyroid (thyroiditis).

IMPORTANT SAFETY INFORMATION

Do not use UNITHROID alone or in combination with other drugs for the treatment of obesity or weight loss.

- **If your thyroid levels are normal, doses of UNITHROID used daily for hormone replacement are not helpful for weight loss.**
- **Larger doses may result in serious or even life-threatening events, especially when used in combination with certain other drugs used to reduce appetite.**

Please see Important Safety Information throughout this brochure and enclosed Prescribing Information.

UNITHROID STANDS APART FROM OTHER THYROID MEDICINES

As the **1st FDA-approved levothyroxine for hypothyroidism**, UNITHROID offers you quality and consistency that's affordable and covered by most insurance plans.^{1,2}

BRAND QUALITY

UNITHROID is made with quality as the priority:

- Third-generation, family-owned manufacturer who makes only a limited number of products to maintain the highest quality standards³
- **Made in the same facility in New York for more than 20 years³**
- Ingredients and materials sourced from the USA and Europe³
- Gluten-free: no ingredient made from a gluten-containing grain (wheat, barley, or rye)³

BRAND-NAME CONSISTENCY

- **No history of recalls, reformulations, or gaps in availability³**
- No worrying about having to substitute another medicine for UNITHROID because it's not available
- UNITHROID is available in **12 dosage strengths**, which can help your doctor find the dose that's right for you.²

IMPORTANT SAFETY INFORMATION *(continued)*

Do not take UNITHROID if you have a problem with your adrenal gland that has not been corrected. Starting thyroid hormone therapy before initiating treatment for adrenal insufficiency may cause a life-threatening condition.

Do not take UNITHROID as the first therapy or additional therapy in a weight control program.

UNITHROID[®]
(Levothyroxine Sodium Tablets, USP)

ACCESSIBLE AND AFFORDABLE

- Covered by the majority of commercial, Medicaid, and Medicare plans³
- Available at major retail chain pharmacies (CVS, Walgreens)

UNITHROID is therapeutically **equivalent (equal)** to **Synthroid**[®] and **Levoxyl**[®].⁴

Please see Important Safety Information throughout this brochure, including Boxed Warning on cover, and enclosed Prescribing Information.

CONSISTENCY MATTERS WHEN IT COMES TO YOUR THYROID MEDICINE

Have you ever noticed that your thyroid pills don't always look the same? With generic thyroid medicine, there's no guarantee that your pills will always come from the same company or be made exactly the same way.

INITIAL PRESCRIPTION

Generic LT
25 mcg

REFILL 1

Generic LT
25 mcg

REFILL 2

Generic LT
25 mcg

REFILL 3

Generic LT
25 mcg

Tablets not shown at actual size.
LT = levothyroxine

IMPORTANT SAFETY INFORMATION *(continued)*

Too much levothyroxine may affect your heart, especially if you are elderly or have cardiovascular disease. When starting UNITHROID, contact your healthcare provider immediately if you have any signs of increased heart rate, chest pain, or an irregular heartbeat.

Too much levothyroxine has been associated with increased bone loss, especially in women after menopause.

Take UNITHROID exactly as prescribed.

Take UNITHROID as a single dose, preferably on an empty stomach, ½ to 1 hour before breakfast with a full glass of water to avoid choking or gagging.

Products such as iron and calcium supplements and antacids can decrease the absorption of levothyroxine, so UNITHROID should be taken 4 hours before or after taking these products.

(Levothyroxine
Sodium Tablets, USP)

SMALL DIFFERENCES CAN IMPACT HOW THYROID MEDICINE WORKS IN YOUR BODY⁵

Staying consistent by asking for the same brand each time can help you avoid:

Possible side effects^{5,6}

Possible TSH level changes⁶

More frequent blood tests⁵

**Make sure you receive
the same pill with every refill.**

IMPORTANT SAFETY INFORMATION *(continued)*

It may take several weeks before you notice an improvement in symptoms. Once your healthcare provider has found your specific dose of UNITHROID, it is important to have periodic lab tests and clinical evaluations to assess your response.

Treatment with thyroid hormone replacement will likely be lifelong.

Before taking UNITHROID, tell your healthcare provider if you:

- have diabetes. UNITHROID may worsen control of blood sugar levels. After starting, stopping, or changing UNITHROID, closely monitor your blood sugar levels and contact your healthcare provider if there are any abnormal changes.

Please see Important Safety Information throughout this brochure, including Boxed Warning on cover, and enclosed Prescribing Information.

available to download on**

This app is intended for informational purposes only. It is not a substitute for professional medical advice, diagnosis, or treatment. Please seek the advice of your doctor in addition to using this app and before making any medical decisions.

UNITHROID[®]
(Levothyroxine
Sodium Tablets, USP)

IMPORTANT SAFETY INFORMATION *(continued)*

Before taking UNITHROID, tell your healthcare provider if you:

- are taking oral blood thinners. UNITHROID may increase your response to oral blood thinners.
- are pregnant, plan to become pregnant or are breastfeeding. Your dose of UNITHROID may need to be adjusted if you become pregnant.
- have any other medical conditions, particularly: heart disease, adrenal or pituitary gland problems, or depression.

Talk to your healthcare provider about:

- all other medications you take, including prescription and non-prescription medicines, vitamins, and herbal supplements. **Do not** change or stop any of your medicines or start any new medicines before you talk to your healthcare provider.
- your diet. Certain foods such as soybean flour, cottonseed meal, walnuts, dietary fiber, and grapefruit juice may cause your body to absorb less levothyroxine and may reduce its effect.
- taking UNITHROID before any surgery.
- hair loss. Partial hair loss may occur infrequently during the first few months of UNITHROID therapy which is usually temporary.

ASK YOUR DOCTOR ABOUT BRAND-NAME **UNITHROID**

“When I prescribe **UNITHROID**, I know that they’re getting an affordable, consistent, and quality product.”*

Dr. Alla Khalfin

takes UNITHROID to treat her Hashimoto's hypothyroidism

Hear about her experience taking UNITHROID.

Hashimoto's thyroiditis is an autoimmune disorder that causes chronic inflammation of the thyroid. It's the most common cause of hypothyroidism in the United States.⁷

*Individual results may vary.

IMPORTANT SAFETY INFORMATION *(continued)*

Tell your healthcare provider if you develop any of the following symptoms: rapid or irregular heartbeat, chest pain, shortness of breath, muscle spasm, headache, nervousness, irritability, sleeplessness, tremors, muscle weakness, increased appetite, weight loss, diarrhea, heat intolerance, changes in menstrual periods, skin rash or any other unusual medical event.

These are not all the possible side effects of UNITHROID. For more information, ask your healthcare provider or pharmacist. Call your healthcare provider for medical advice about your health or medicines, including side effects.

To report SUSPECTED ADVERSE REACTIONS, contact Amneal Specialty, a division of Amneal Pharmaceuticals LLC at 1-877-835-5472 or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.
